

Physics-Informed UMAP for Exoplanet Representation Learning

Samuel Worku

May 29, 2026

Abstract

We propose Physics-Informed UMAP for structured exoplanet embedding.

1 Method

We compare PCA, t-SNE, UMAP, and Physics-UMAP.

2 Results

Method	Silhouette	Davies-Bouldin	Physics-Consistency
Physics-UMAP	0.462662	0.845917	0.267783
